

Valor SMARTFIRE SYSTEM

LUXURY. EFFICIENCY. QUALITY. CONVENIENCE. HEAT.

ADVANCED CONTROLS - VALORSTAT & VALORSTAT PLUS

The advancements of electronics has raised the bar in smart fireplace design. The ValorStat control system maintains a **steady, even comfort** and can be programmed to provide heat only when you want it - at the temperature you desire. The ValorStat Plus remote pilot ignition system (on direct vent models) allows you to turn the pilot light on and off as easy as your television set. By turning the pilot off for the summer you can enjoy up to 3 hours of heat every evening in January with the gas you've saved! A handheld remote control comes standard with all Legend G3 insert models.

ZONE HEATING

Central furnaces burn a lot of gas in efforts to heat your entire home. By heating with a Valor, you can **efficiently heat individual living spaces** that you spend the most time in. Further, your duct system can lose up to 30% of the heat through leaks and inefficient design. A Valor has no ducts and delivers a blend of **radiant and convected heat** into the zone you spend most of your time. Zone Heating is a proven way to cut fuel consumption. Turn down your gas guzzler and turn on a Valor.

RADIANT HEAT

Valor fireplaces are known for producing radiant heat - we do it by design. Radiant heat satisfies human comfort with up to **25% less energy** than warm air systems. Radiant heat replaces the chill lost to cold windows and walls and is what attracts humans to fire. Our radiant fires are another reason a Valor can **reduce your energy bill and increase your overall comfort**.

HEAT DURING A POWER FAILURE

If the power fails in the winter your home can get cold fast. Valor fireplaces are **fully functional heaters that don't use electricity**. Our fireplaces provide the perfect mixture of **radiant and convective heat** eliminating the need for a noisy, inefficient fan. **No power, no problem** with Valor!

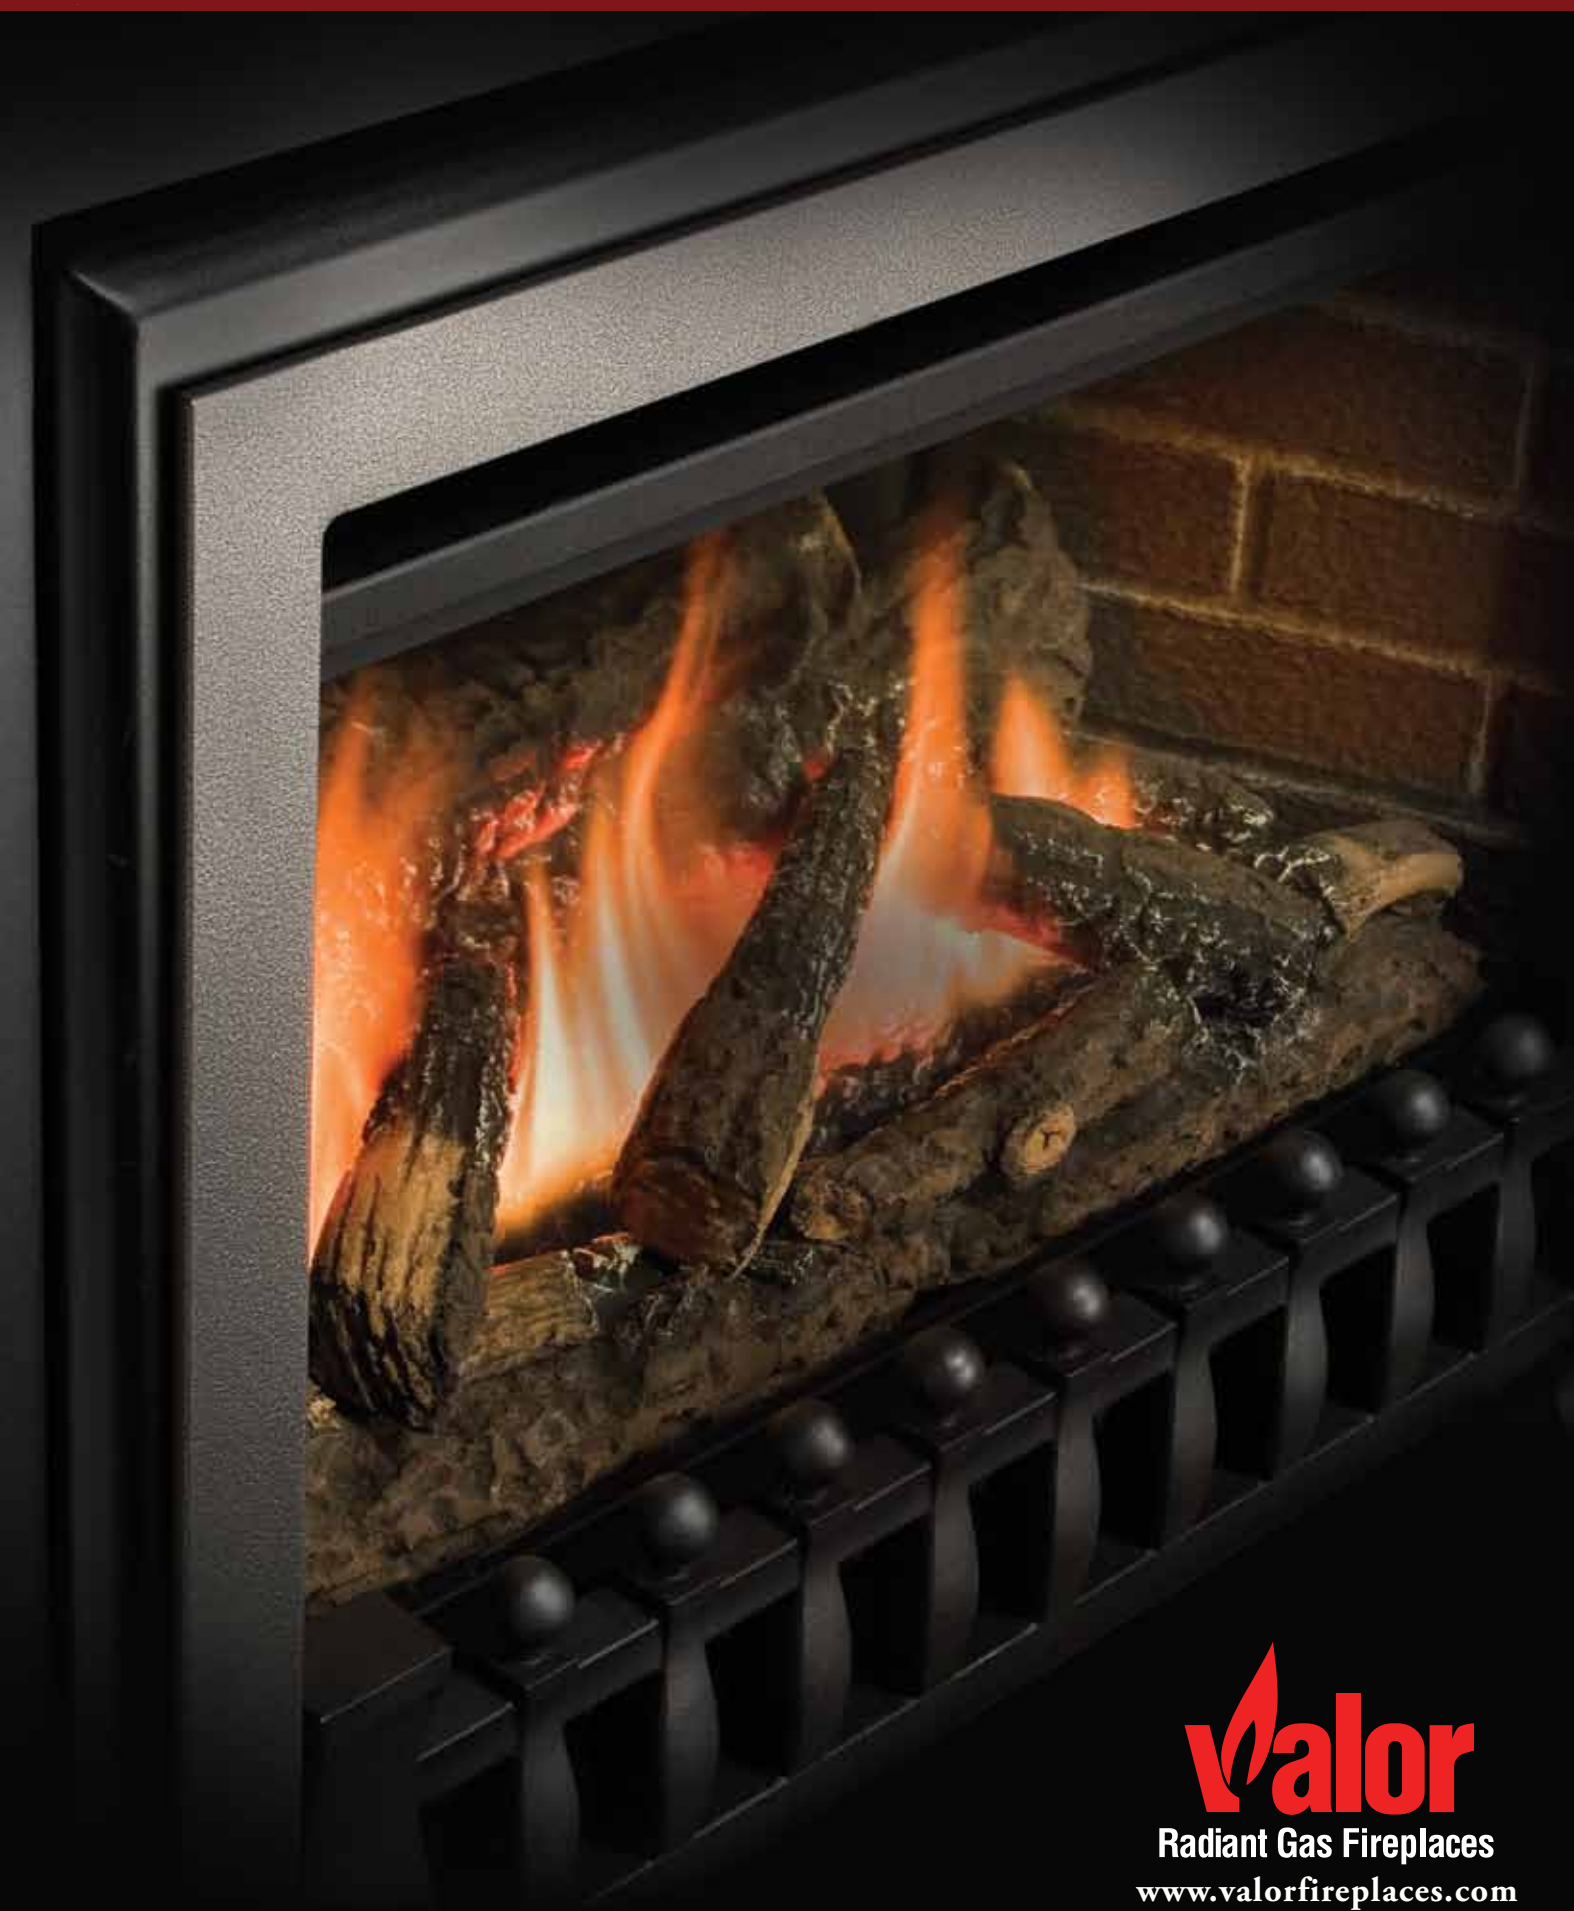

BURN CLEAN, ENGINEERED GREEN

Natural gas is the **cleanest fireplace fuel** you can burn with the lowest particulate levels and lowest levels of greenhouse gases. Valor specializes in producing **energy efficient, heater-rated** natural gas fireplaces designed to consume less fuel than the average fireplace insert.

Legend G3 Log Engine with FenderFire Double Doors (743FVI) and Cast Surround (715CVI)

THE LIVING LEGEND CONTINUES...

We know that legends are made - not born.

And so, since introducing our first Valor Legend insert model in 1991, we have strived to improve on every aspect of our flagship line, seeking to exceed our customers' expectations with every new innovation.

The Legend G3 has further expanded the range of easy to use, energy saving features as well as some stunning new hearth enhancing designs.

Embodying over 100 years of Valor fireplace tradition accompanied by the latest in state-of-the-art technology, the Legend G3 continues to be the industries number one selling gas fireplace insert.

FIREBED OPTIONS

The Legend G3 features:

- Handcrafted log set design
- Optional - Creekside river rock and driftwood firebed
- Optional - Decorative Rock Kit Accessory for the Creekside firebed
- Optional - Gloss black enamel reflective panels (brick liners)

SMART CONTROL SYSTEM

The ValorStat Remote Control gives you the power to select, adjust and program the desired temperature that you want.

The built-in timer turns your fireplace ON to warm your home before you wake up and can be programmed to turn OFF after you go to bed.

Our all new ValorStat Plus (featured on the direct vent G3) has the ability to turn your pilot light ON and OFF from the programmable remote control. You'll never have to get on your hands and knees to light the pilot again!

STEADY, EVEN HEAT

As pioneers of radiant and convected heat technology, we've engineered the G3 to be a heater-rated, energy efficient fireplace.

A 70% turndown (with a low of 6,500 BTU from a high of 26,000 BTU using natural gas) allows you to match the fire's intensity to your specific home comfort needs.

Not just on or off (which is inefficient) the Valor modulating system runs like cruise control, maximizing comfort and efficiency.

BUILD YOUR OWN LEGEND

TRIMS, FRETS & SURROUNDS

Customize the look of your insert with our wide selection of interchangeable quality cast surrounds, steel trims and distinctive fret options.

CLEARVIEW FRONT

The Clearview Front is designed to maximize your overall viewing area of the flame and fuel bed, creating a distinct, realistic fire. Clean, well defined lines embrace contemporary design elements in your home, especially for renovators looking to update and upgrade an old fireplace.

Legend G3 Log Engine with Clearview Front (745CFV), Ventana Fret (1225VFB) and Square Trim Kit in Black (756STB)

1. Black Square Trim Kit (756STB) and Contemporary Front in Copper (765CSC)
2. Vintage Square Trim Kit (756STV) and Contemporary Front in Black (765CSB)
3. Brushed Nickel Square Trim Kit (756STP) and Contemporary Front in Black (765CSB)

764PFB 4-SIDED PICTURE FRAME TRIM KIT

The Picture Frame 4-sided square trim kit works exclusively with the G3 Contemporary Front collection. Ideal for “up the wall” applications, the Picture Frame is evenly proportioned and landscape in design.

The 764PFB must be installed with a 765 Contemporary Front. Available in black only.

CREEKSIDE RIVER ROCK

Introducing the Creekside river rock firebed for the Legend G3 Insert. Contemporary in design, the Creekside embodies a Zen-like mystique. The firebed glass base beautifully reflects and illuminates flame movement from within.

** EnerGuide Ratings and Outputs have been determined without a fan/blower, using the CSA P4.1-02 test method
 ** A.F.U.E. (Annual Fuel Use Efficiency) tested as per 10CFR - 430.23 Certified to ANSI Z21.88 / CSA 2.33 Vented Gas Fireplace Heater Standard CAN 1-2. 17 Gas Fired Appliances For Use at High Altitude

About Our Efficiency Ratings
 At Valor we use recognized Canadian and US government test methods for determining energy efficiency performance. This ensures our products will perform in your home as rated. Beware of misleading "steady state" efficiency claims made by manufacturers using their own "in-house" test methods. For more information visit our website at valorfireplaces.com

Fill in the diagram dimensions below then stop by your local Valor dealer to see if a Legend G3 will work in your home.
